*Examiner's Amendment**Drawings*

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: "166" (see page 2, [0023] paragraph, Fig. 5). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "50" has been used to designate both "vacuum vane pump (see page 10, [0019] paragraph, line 1" and "gap (see page 11, [0021] paragraph, line 15)". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any

required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Lance J. Lieberman (Reg. No. 28,437) on February 28, 2005. During telephone conversation with Mr. Lieberman, an agreement was reached to amend Claim 10.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. The application has been amended as follows:

Claim 10, line 1, "*with claim 10*" has been changed to --*with claim 9* --.

The amendment to the claim has been entered to correct a typographical error.

Allowable Subject Matter

Claims 1-40 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 9 and 32: the prior art fails to disclose or render obvious the claimed combination including: a rotor including a plurality of slots defined about the rotor, each of the slots extending inwardly from the peripheral edge and including a first stop defined on the each slot; and a plurality of elongated vanes each disposed in a respective one of the slots for outward sliding movement of the vanes wherein each of the vanes having a tapered sidewall that defines a second stop located on the each vane for releasable engagement with the first stop of the respective slot to capture through the releasable engagement at least a longitudinal inner portion of each vane within the respective slot.

Regarding claims 17 and 24: the prior art fails to disclose or render obvious the claimed combination including: a rotor including a plurality of slots defined about the rotor, each of the slots extending inwardly from the peripheral edge and including a first stop defined on the each slot; and a plurality of elongated vanes each disposed in a respective one of the slots for outward sliding movement of the vanes wherein each of the vanes having a tapered sidewall that defines a second stop located on the each vane for releasable engagement with the first stop of the respective slot to capture through the releasable engagement at least a longitudinal inner portion of each vane within the respective slot; and a sensor for detecting engagement of the first and second stops.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
